country produced 149.89 MMT of refined petroleum products, with the private sector refineries contributing 40.92 MMT. Therefore, the surplus products have necessarily to be exported.

Scarcity of water

†*308. SHRI BRIJ BHUSHAN TIWARI:
SHRI JANESHWAR MISHRA:

Will the Minister of WATER RESOURCES be pleased to state:

(a) whether Government is aware of scarcity of water in the country;

(b) if so, whether any initiative is being taken by Government for the distribution of water of Chenab, Kosi and Brahmaputra rivers under the international law; and

(c) if so, the details thereof?

THE MINISTER OF STATE IN THE MINISTRY OF WATER RESOURCES (SHRI JAY PRAKASH NARAYAN YADAV): (a) the UNESCO Water Portal states that water scarcity has been defined as a situation where water availability in a country or a region is below 1000 cubic metre per person per year. Considering the population of 2001 census, the per capita water availability in India works out to be 1820 Cubic Metre. The per capita water availability is declining because of population growth. The National Commission on Integrated Water Resources Development has estimated that by the year 2050, when the population is expected to stabilize, the per capita water availability would be 1140 Cubic Metre. However, the per capita water availability varies considerably from one basin to another.

(b) and (c) Distribution of Chenab waters is governed by the provisions of Indus Waters Treaty 1960 between India and Pakistan. Under the Treaty, India is under obligation to let flow all the Chenab waters and not permit any interference with these waters, except for uses, as specified in the Treaty. A bilateral agreement on Kosi Barrage was signed between the Governments of India and Nepal in 1954, which was later revised in December 1966. There is no bilateral agreement with China for distribution of waters of Brahmaputra river. However, a Joint Expert Level Mechanism (ELM) has been set up under cooperation with China for cooperation for the supply of flood season hydrological data by China on river Brahmaputra.

Job loss due to economic crisis

*309. MS. SUSHILA TIRIYA: Will the PRIME MINISTER be pleased to state:

(a) whether it is a fact that there is a likelihood that lakhs of employees may have to lose their jobs in the near future in view of the global economic crisis;

(b) if so, the details thereof; and

(c) the steps taken by Government in this regard?

THE MINISTER OF STATE IN THE MINISTRY OF FINANCE (SHRI PAWAN KUMAR BANSAL): (a) and (b) Unlike the developed countries where job losses have been reported due to the global financial crisis, the impact has been limited in India as a large proportion of population is employed in the agriculture sector which has not been affected by the crisis.
